

A detailed technical line drawing of a mechanical assembly, likely a pump or engine component, rendered in a light gray color on a dark gray background. The drawing shows various parts including a central shaft, a large flywheel or impeller on the right, and a complex base with mounting points. The drawing is a cross-section, showing internal components and the assembly's structure.

FLOWPAX
SENDIRIAN BERHAD

A faint, light gray technical drawing of a mechanical assembly, possibly a pump or engine component, serves as the background. It features various lines, circles, and hatching, typical of engineering sketches. The drawing is centered and occupies most of the frame.

WELCOME

“Gold is where you find it, according to an old adage, but judging from the record of our experience, oil must be sought first of all in our minds.”

Wallace Pratt, geologist, (1885-1981), Oil in the Earth (1944)

ABOUT US

FLOWPAX SDN. BHD. is a Malaysian based Company established in 2013 focusing in supply of industrial valves, mainly ball valve and actuated valve. We strive in assuring highest engineering and technical competence normally used to feed our Client's request with on time delivery. We offer a wide range of International Standard valves to accommodate our Client's needs.

As one of the valves suppliers in Malaysia, we are promoting the concept of “Flow as a Pax” whereby competition turns into partnership in making sure all requirement & delivery are met.

FLOWPAX SDN. BHD. will assist Clients and Partners in developing Malaysia’s and its regional Oil & Gas industry.

We are the sole distributor for Valvulas Industriales, FEVISA, of Spain for supply and distribution of their vast range of valves to Malaysia. With Flowpax experience in supplying to Companies like PETRONAS, SHELL, CPOC, REPSOL and other major Oil & Gas players in Malaysia, we are confident that we will be able to supply proven & reliable valves for your needs.

We are also able to cater fast track delivery with wide range of valves from ex-stocks that will support our clients urgent requirement during planned / unplanned maintenance or shutdown as well as valve replacement activities.

Our Mission

To continuously improve the quality and delivery of technical solutions and services.

To foster a healthy and safe working environment.

To advocate quality in our endless support to Clients & Partners.

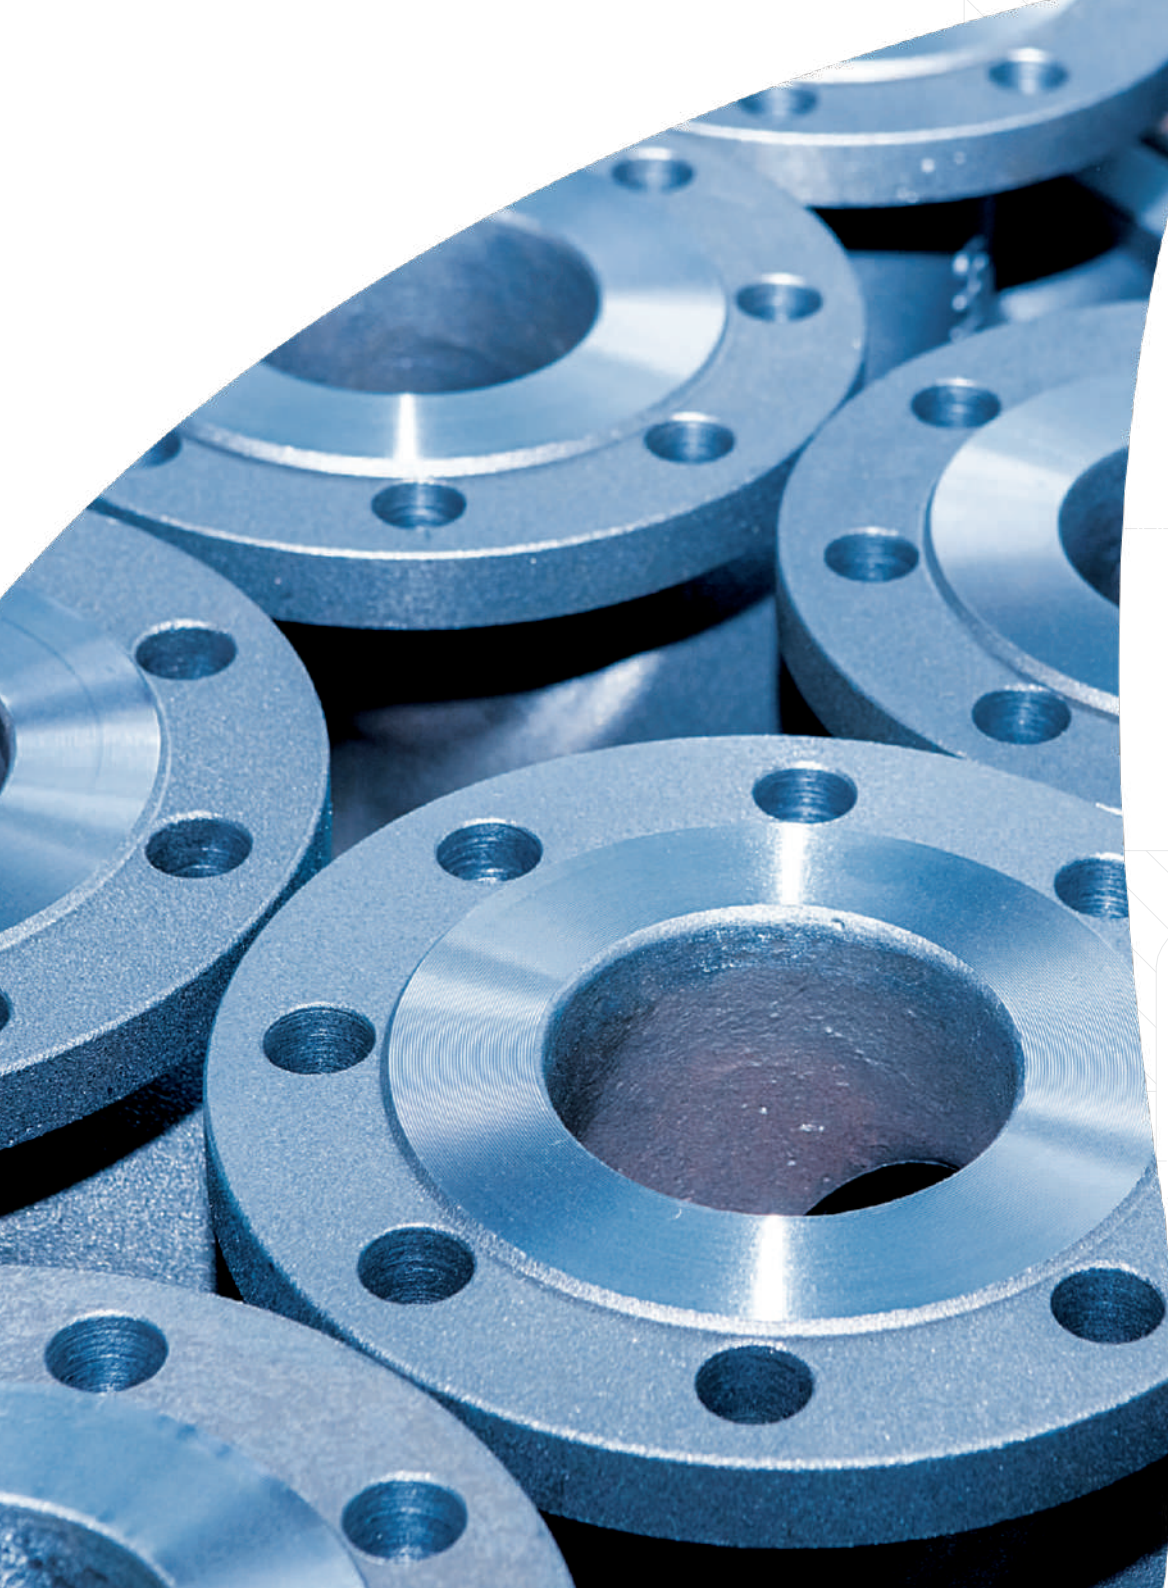

To grow & expand our business and renowned for our quality products and services.

To protect the environment

To uphold integrity in our operation and behavior as a PAX in business.

The background image shows a complex industrial facility with large, polished metal pipes and structural beams. A technical overlay of blue lines and geometric shapes is visible on the right side of the image. A white rectangular box is positioned on the left side, containing the text 'OUR SERVICES'.

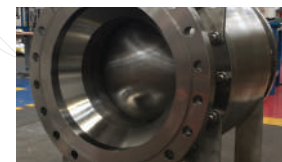

OUR SERVICES

Valves & Actuators

Flowpax Sdn. Bhd. offers sales, design and services of manual & actuated valves for flow control application, specializing in the supply of pneumatic, electric and hydraulic actuated valve packages.

Flowpax team has the knowledge, experience, and expertise to propose technical and yet practical solutions with ideas and innovation to Oil & Gas, Petrochemical, Power Generation, Utilities (Electric, Water & Gas) and Marine industries.

Servicing

As part of Flowpax ongoing effort to provide total solution initiatives to Clients and its Partners, our highly skilled and specialized local resources with the collaboration of Flowpax's Principals shall be providing services & after sales support consultations to cover a vast range of onsite maintenance requirement and troubleshooting works i.e. Valve Servicing, Valve Repair, Overhaul & Testing.

These works shall include Lubrication, Greasing, Repairs, Refurbishment, Preservation and Testing of Valves.

Fabrication & Pipes

Flowpax extends assistance whenever there is a requirement for Composites & Conventional pipes which encompass the design & manufacture of tanks, pressure vessels, piping systems and custom designed process equipment predominantly for aggressive & corrosive media that utilizes FRP, thermoplastic and advanced composite materials.
